SUBJECT (Descriptive title. Use individual reports for separate subjects)

FLYING DISK BEING MANUFACTURED BY USSR

SUMMARY (Give summary which highlights the salient factors of narrative report. Begin narrative text on AF Form 112a unless report can be fully stated on AF Form 112. List inclosures, including number of copies)

1. This report was prepared by the Air Technical Intelligence Section, 6004th AISS, as part of a routine open source screening program for items appearing in Japanese language publications.

2. This report relates the manufacture of a "Flying Disk" in Soviet Russia.

SUPPLEMENT TO AF FORM 112

ORIGINATING AGENCY	REPORT NO.	PAGE	OF	PAGES
6004th Air Intel Sv Sq	IR 5407-57	2	2	

1. This report is a translation of an article of air interest from the 2 October 1957 edition of the TOKYO SHIMBUN. The data presented have been reviewed by personnel of the Air Technical Intelligence Section, 6004th AISS.

FLYING DISK BEING MANUFACTURED BY USSR

2. Soviet Russia's scientific magazine "Knowledge is Power", has published a statement made by Professor M. S. ZZONJAIN (Phonetic) to the effect that the USSR presently is manufacturing the "Flying Disk". According to the statement, this flying disk can ascend or descend vertically. The engine takes in air from a hole in it's round-shape wing, which produces a vacuum state on a part of it's surface, thus creating a strong underneath air pressure for the take-off. The pilot room is gyroscopic so that it will turn toward the direction the disk is proceeding. The shape of this disk resembles the "Flying Disk" heard of in Western Europe. The principal point in it's manufacture is to overcome a preventive wall of heat. To solve it, the wing of the disk must be allowed to vibrate frequently. Many holes are drilled in the fuselage to shed out a special cooling liquid.

COMMENTS OF THE PREPARING OFFICER:

3. The TOKYO SHIMBUN is an openly pro-American newspaper in which general news and industrial and scientific articles are presented for general populace reading.

4. This is the first information received by the Air Technical Intelligence Section, 6004th AISS relative to this particular type of aircraft being manufactured in the Soviet Union.

Anthony M. Pereira

ANTHONY M. PEREIRA
Capt., USAF
OIC, ATI Section
6004th AISS
